GATTI PRECORVI
Innovation since 1941

Gatti Precorvi Innovation since 1941

Today, Gatti Precorvi is located in production premises totalling 45,000 sqm, 15,000 sqm of which are covered to be able to meet every type of order.

Thanks to careful production logistics and highly specialized departments, high-tech requirements can also be met and the production departments are supported by in-house tooling and Quality Control.

Design Department ensures customers are provided with all technical support and after-sale service.

Gatti Precorvi has played a major role in the technical evolution and technology applied to the perforation sector.

Today, Gatti Precorvi's innovative spirit and capacity to produce innovative products allows their partners to undertake major projects, both in the industrial and building industry.

We understand your needs

Gatti Precorvi has always worked closely with clients and is able to form, cut and bend perforated and embossed plates as well as perform superficial treatments such as polishing and painting.

Component assembly is also available.

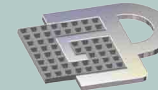

Proven reliability

Gatti Precorvi has been working in perforation since 1941, and are one of the most strong performing companies in Europe, due in part to systems that can meet the most demanding needs of the market.

The company is UNI EN ISO 9001:2008 certified.

Our Know-How at your service

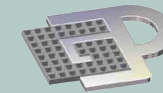

Gatti Precorvi applies their know-how and skills to innovation in engineering for energy and environment innovative saving, serving as a partner in the business sectors involved in building and industrial innovation. Gatti Precorvi engineer, design, supply and assemble their impressive range of architectural products.

Gatti Precorvi can prevent, face and solve customer's problems: with responsibility and technical skills Gatti Precorvi takes upon itself the managing of complex projects avoiding that all handling issues would fall on customers' shoulders.

Major European firms and companies have selected Gatti Precorvi and awarded them with ambitious projects in different sectors; we are proud to have met their needs and have contributed to the achievement of important goals.

GATTI PRECORVI
Innovation since 1941

Gatti Precorvi is the ideal partner for companies specialising in facade claddings by offering the following products:

Motor-driven sunscreen blades for rotation and packaging in active and passive climate walls, managed autonomously and intelligently by B.M.S. and Siemens controller.

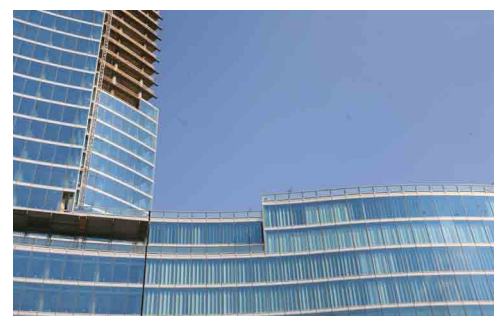

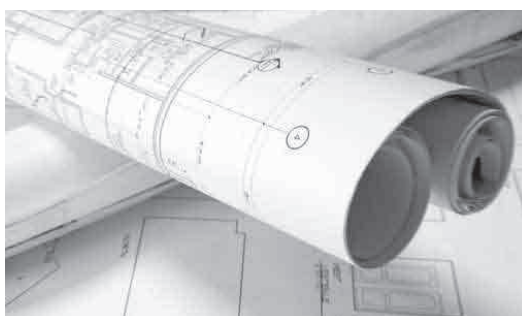

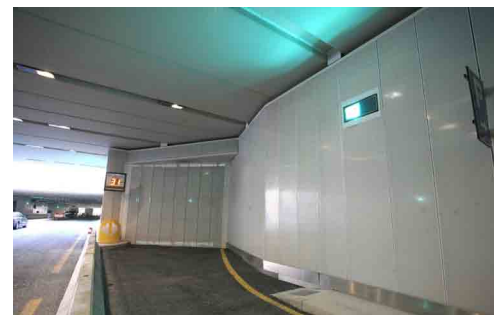

Motor-driven or fixed sunscreen blades in perforated plates for outdoor installation, or extruded aluminium that can be orientated.

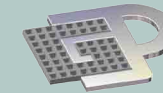

Perforated ventilated sound absorbent walls for claddings in tunnels with application of smog - absorbing and or anti graffiti design paintings

Cladding for outdoor front walls or indoor in perforated plates, with materials such as aluminium, stainless steel, corten, painted metal sheet, reynobond, alucobond and copper. The supply includes the structure underneath and façade accessories

Cladding for outdoor front walls in metal plate with design lining in stainless steel, aluminium and painted metal plates.

Technological cladding with ventilated walls consisting of external coating in different materials, and blind insulated cells for soundproof panel application.

ASSEMBLY
Our specialized technicians will assemble the system in full compliance with delivery terms.

PARTNERSHIP PRODUCTS
Every product is designed in collaboration with.

VALIDATION TESTS AND FINAL CHECK
Every product is tested and checked.

PROJECT MANAGEMENT WITH SAP
The orders are managed with SAP applications, from the design until delivery.

TECHNICAL-COMMERCIAL ASSESSMENT PRODUCT ACCEPTANCE
Every product is designed and made after careful assessment of technical and commercial elements.

SOFTWARE DESIGN.
We use Catia – Cad. Inventor software programs.

VISUAL PROTOTYPE
Visual prototyping allows more comprehensive analysis and support in the commercial step.

OUR KNOW-HOW AVAILABLE TO INDUSTRY
Our know-how, experience and skills are made available for the customers.

LOGISTICS MANAGEMENT WITH SITE INTERFACE.
To ensure the best efficiency, the assembly steps are monitored and planned.

PROTOTYPE
Prototyping allows developing remarkable innovation.

STRUCTURE CALCULATION WITH REPORTS SIGNED BY REGISTERED PROFESSIONALS
Nothing is left to chance, and professional engineers certify everything.

CERTIFICATIONS
Both production and assembly are carried out according to certified steps.

Sun-Breakers

MILANO - Italy

HEAD OFFICES OF REGION LOMBARDIA

The site is located in a highly urbanised area in the City of Milan, among via Melchiorre Gioia, via Restelli, Via Algarotti and Via Galvani. This area covers a surface of 190,000 square metres with a tower 161 metres high.

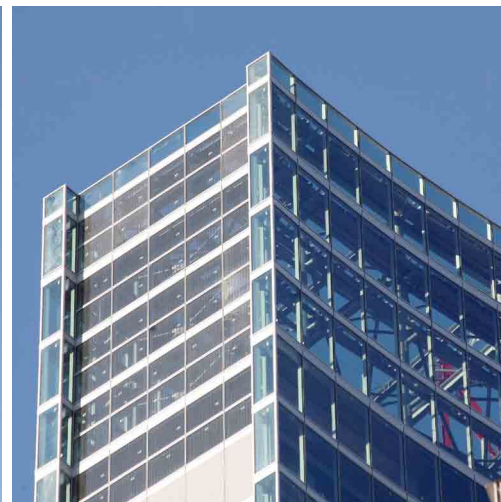

This prestigious work has been designed by great architects and it is destined to become the centre of important vital activities: a wide park will surround the building, with porches, pedestrian areas and parking lots.

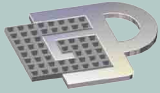

Features:

This building presents indoor sunbreakers system mounted on an active climatic wall

DESIGNER: Pei Cobb Freed & Partners Caputo Partnership and Sistema Duemila. CUSTOMER Infrastrutture Lombarde SPA was the main contractor. All the works were done by Consorzio Torre (Consorzio Stabile Techint Infrastrutture, Impregilo, Sirti, Consorzio Cooperative Costruzioni, C.M.B., Cile, Costruzioni Giuseppe Montagna, Pessina Costruzioni).

PROJECT SIZE: realisation of perforated sun breakers to control the sun radiation with vertical sun breakers located in an inner zone between two glasses. 45000 sqm of glass facade and 32000 perforated sun breakers were supplied.

**PORTA NUOVA
"GARIBALDI" BUILDING**

DESIGNER: Pelli Clarke Pelli Architects

CUSTOMER: The group of investors led by Hines European Development Fund, includes Italian and foreign institutional investors

PROJECT SIZE: Design and supply of 2900 outdoor perforated sun breakers made of stainless steel.

PERFORATED METAL SHEETS

Applications

The perforated metal sheet is used in many different fields. From agriculture to building construction, from the medical industry to car manufacturers, from manufacturers of household appliances to the most varied applications in style: in other words, perforated sheets are an integral part of modern life.

Gatti Precorvi produces perforated metal sheets in various materials, such as stainless steel, aluminium, mild steel, and other special alloys for different applications.

In the future, other perforation patterns for other applications will be requested and Gatti Precorvi are ready to meet the needs of innovation of customers with reliability and enthusiasm.
