Gatti Precorvi Innovation since 1941

Today, Gatti Precorvi is located in production premises totalling 45,000 sqm, 15,000 sqm of which are covered to be able to meet every type of order.

Thanks to careful production logistics and highly specialized departments, high-tech requirements can also be met and the production departments are supported by in-house tooling and Quality Control.

Design Department ensures customers are provided with all technical support and after-sale service.

Gatti Precorvi has played a major role in the technical evolution and technology applied to the perforation sector. Today, Gatti Precorvi's innovative spirit and capacity to produce innovative products allows their partners to undertake major projects, both in the industrial and building industry.

We understand your needs

Gatti Precorvi has always worked closely with clients and is able to form, cut and bend perforated and embossed plates as well as perform superficial treatments such as polishing and painting.

Component assembly is also available.

Proven reliability

Gatti Precorvi has been working in perforation since 1941, and are one of the most strong performing companies in Europe, due in part to systems that can meet the most demanding needs of the market.

The company is UNI EN ISO 9001:2008 certified.

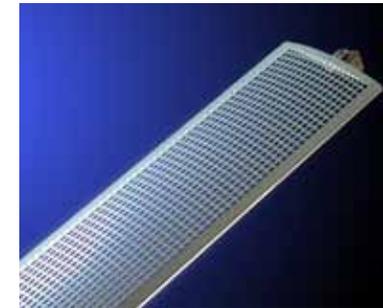

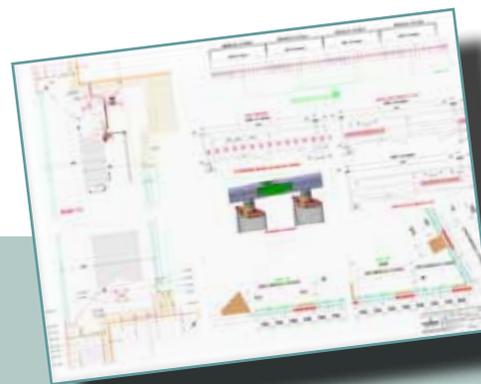

Our Know-How at your service

Gatti Precorvi applies their know-how and skills to innovation in engineering for energy and environment innovative saving, serving as a partner in the business sectors involved in building and industrial innovation. Gatti Precorvi engineer, design, supply and assemble their impressive range of architectural products.

Gatti Precorvi can prevent, face and solve customer's problems: with responsibility and technical skills Gatti Precorvi takes upon itself the managing of complex projects avoiding that all handling issues would fall on customers' shoulders.

Major European firms and companies have selected Gatti Precorvi and awarded them with ambitious projects in different sectors; we are proud to have met their needs and have contributed to the achievement of important goals.

Gatti Precorvi is the ideal partner for companies specialising in facade claddings by offering the following products:

Motor-driven sunscreen blades for rotation and packaging in active and passive climate walls, managed autonomously and intelligently by B.M.S. and Siemens controller.

Fixed or motorised brise soleil, adjustable, for outdoor use, made from perforated sheet metal and extruded profiles.

Perforated ventilated sound absorbent walls for claddings in tunnels with application of smog - absorbing and or anti graffiti design paintings.

Cladding for outdoor front walls or indoor in perforated plates, with materials such as aluminium, stainless steel, corten, painted metal sheet, reynobond, alucobond and copper. The supply includes the structure underneath and façade accessories.

Cladding for outdoor front walls in metal plate with design lining in stainless steel, aluminium and painted metal plates.

Technological cladding with ventilated walls consisting of external coating in different materials, and blind insulated cells for soundproof panel application.

GATTI PRECORVI

Fixed Sun-Breakers

RICCIONE - Italy

Technology, design and innovation, while protecting the environment. Designed in the name of high-tech design environmental compatibility and easy access, the Congress Hall in Riccione, is entirely made of glass, blending in with the surrounding environment.

Palariccione SpA **Congress Hall in Riccione** **Viale Virgilio, 17 - Riccione**

Features:

This building presents outdoor fixed sunbreakers.

DESIGNER: Arch Batarra & Gianni Ronchetti.

CUSTOMER: Town of Riccione.

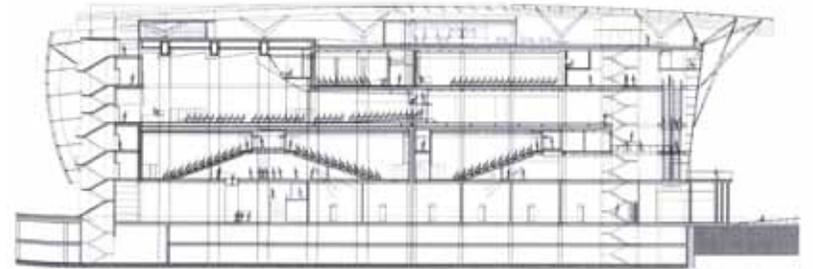

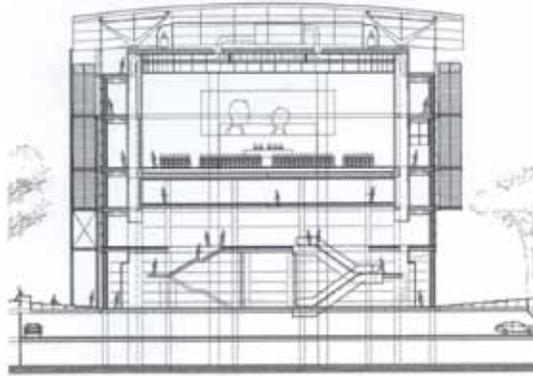

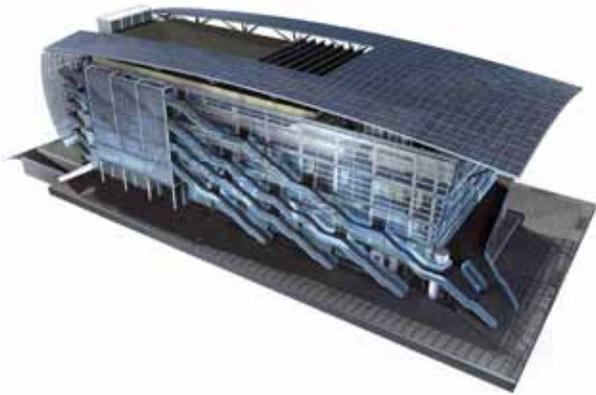

PROJECT SIZE: realisation of an external outer cover with fixed sun breakers. 12000 fixed sun breakers of pre-painted aluminium were done.

GATTI PRECORVI
Innovation since 1941

Fixed Sun-Breakers

Sun-Breakers

MILANO - Italy

HEAD OFFICES OF REGION LOMBARDIA

The site is located in a highly urbanised area in the City of Milan, among via Melchiorre Gioia, via Restelli, Via Algarotti and Via Galvani. This area covers a surface of 190,000 square metres with a tower 161 metres high.

This prestigious work has been designed by great architects and it is destined to become the centre of important vital activities: a wide park will surround the building, with porches, pedestrian areas and parking lots.

Features:

This building has an internal sun-shading system mounted on an active climatic wall making this a class "A" building. The winner of the Council on Tall Buildings and Urban Habitats "2012 Best Tall Building Europe" award.

DESIGNER: Pei Cobb Freed & Partners Caputo Partnership and Sistema Duemila.

CUSTOMER: Infrastrutture Lombarde SPA was the main contractor. All the works were done by Consorzio Torre (Consorzio Stabile Techint Infrastrutture, Impregilo, Sirti, Consorzio Cooperative Costruzioni, C.M.B., Cile, Costruzioni Giuseppe Montagna, Pessina Costruzioni).

PROJECT SIZE: The creation of perforated brise soleil to control solar irradiation by using vertical blades in an internal area, between two panes of glass. Some 32,000 m² of perforated brise soleil were supplied to shade the glass façade (45,000 m²).

Sun-Breakers

MILAN - Italy

HEAD OFFICES OF REGION LOMBARDIA
The climatic wall of the new Regione Lombardia complex has a glass façade that incorporates our electronically controlled sun-shading blades. This system, called BMS (Business Manager System), is 100% computerised and was developed in collaboration with Siemens Italia.

Sun-Breakers

MILAN - Italy

SIPAL BUILDING DARWIN

The building site is located in via Darwin, Milan.

Features:

The system consists of 4500 m² of extruded aluminium profiles fitted on the external window frames. The blades are installed in groups of 5 and are electronically programmed to follow the sun automatically. This system optimises the sun-shading effect and thus increases office comfort.

DESIGNER: Dante O. Benini and Partners architects

CUSTOMER: Brioschi Sviluppo Immobiliare, S.p.a.

PROJECT SIZE: Supply of 3800 sqm of outdoor motorised sun breakers.

GATTI PRECORVI

Sound absorption

Application of sound absorption barrier.

Installation of panels for sound absorption and road planning.

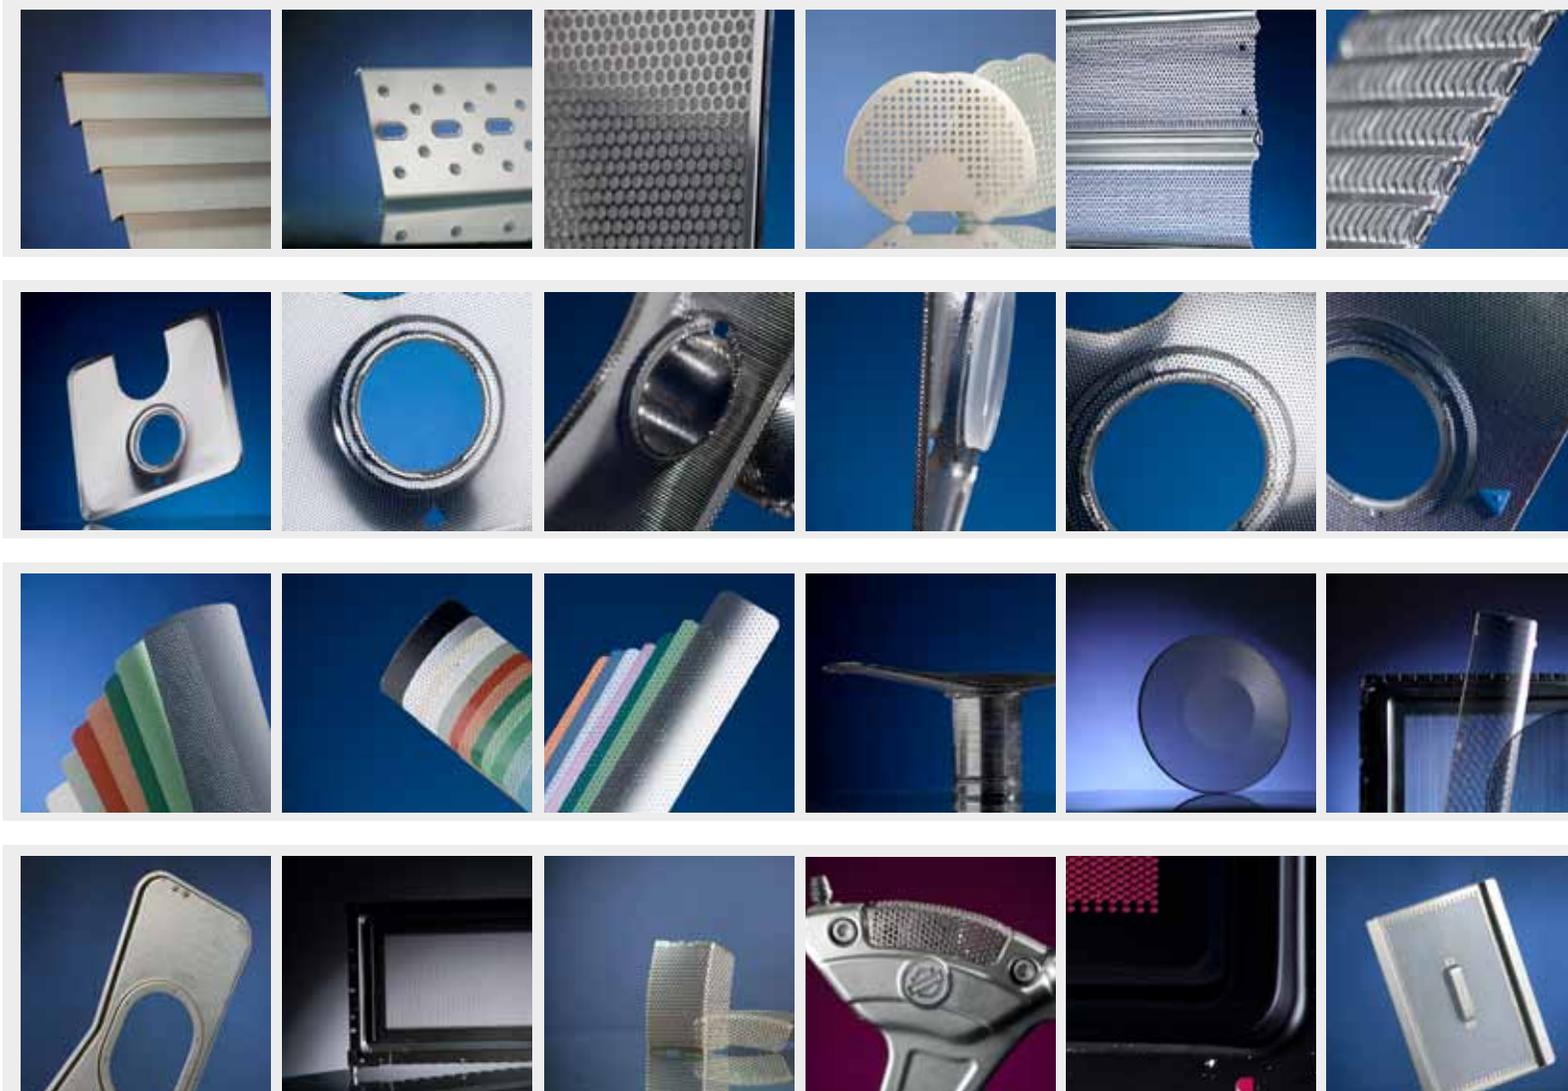

Sound absorption

Application of sound absorption barrier.

Metal soundproof barrier perfectly integrated in the urban context.

PERFORATED METAL SHEETS

Applications

The perforated metal sheet is used in many different fields. From agriculture to building construction, from the medical industry to car manufacturers, from manufacturers of household appliances to the most varied applications in style: in other words, perforated sheets are an integral part of modern life.

Gatti Precorvi produces perforated metal sheets in various materials, such as stainless steel, aluminium, mild steel, and other special alloys for different applications. In the future, other perforation patterns for other applications will be requested and Gatti Precorvi are ready to meet the needs of innovation of customers with reliability and enthusiasm.
